THE PREFACE.

THE Design of this Book is, that the Duties payable upon all Commodities, or to be drawn back upon reshipping in Time, may easily be known; not at all meddling with the penal Part of the Customs.

All Merchandize whatsoever have the Duties laid on them by the Quantity, or upon the Value, or both.

By the Quantity, is to be understood the Ton, Yard, Pound Weight, Hundred Weight, &c.

The Value of Merchandize, according to which the Duties are to be computed, is determined four Ways; 1st, By the Book of Rates; 2dly, By Ancient Prescription; 3dly, By the Price at the Candle, as by an Act of the Second year of Her Majesties Reign, which affects all East India Goods, except Coffee, the Value of which are not rated in the Book of Rates. 4thly, By the Oath of the Importer, which relates to all other Unrated Goods whatsoever. The 3d, and 4th Ways, have two Cases, some Duties being to be taken from the Value Exclusrve of the Duties, and others from the Value Inclusive of the Duties, the latter of which are in this Book distinguished from the former by a Star.

The Duties being many on each Species of Goods and divers Commodities being liable to the

The P R E F A C E.

same Number of Duties, and by the very same Acts, all such Goods which are alike affected have their Duties ranged under Classes Numbred with the Letters of the Alphabet. Each Class contains seven Columns.

1. *The Act of Parliament which imposed the Duties; that Recourse, in Cases of Doubt, may easily be had.*
2. *The Names by which the Duties are commonly known.*
3. *The Duties payable upon the Quantity.*
4. *The Duties payable upon the Value.*
5. *The Discounts allow'd without consideration of Time.*
6. *The Discounts allow'd on consideration of Time at so much per Cent per Annum.*
7. *The Equated Discount, accounting for the Time the Acts allow.*

But, though several sorts of Goods pay the same Number of Duties, and by the very same Acts, yet such Duties are on some Goods greater than on others; and in the Classes where this has happen'd, there are the Cases put down number'd with the Numerical Figures.

The Letters against the Rates refer to the Classes, and if Figures are joyn'd to them, they refer to the Cases, which may be understood by this Example:

Adzes for Coopers the Dozen, is in the Rates 12 s. which is the Value upon which the Duties are to be taken, in the next Column is BB 11.

BB

The PREFACE.

BB refers to a Class so marked where it will be found that they pay the Old, New, $\frac{1}{4}$ and $\frac{1}{2}$ Subsidies and Impost 1695. The Number 11 shews the Case, and how much the Impost is, which being laid upon the Quantity or Weight of the Iron, is therefore placed in the Third Column. Under the Class is the Draw-back. After the Manner of this Example, all the others are to be understood.

The New Duties upon Paper and Leather, could not be brought into the Classes, because the Species or kinds of Paper and Leather are different in the Rates from what they are in the Acts granting the new Duties, therefore they are put at the end of the Classes, and where-ever there is Paper or Leather in the Rates there are References to the said new Duties upon Leather by Æ 1, and upon Paper by Æ 2.

Some particular Commodities falling into the same Class with others as to the Duties yet differing as to the Draw-backs, a Table is made of such to prevent increasing the Number of Classes. Every Thing else is conceived to be so plain as to want no Explanation.

As to the penal Part, and the Rules and Practices in the Management of the Customs, they being of a different Nature from the Book of Rates and the Duties, did therefore not come within the design of this Piece, but are intended for a separate Book.

21 January, 1711.
